

7.1 GET ALL COUNTRIES FROM ASIA/REGION USING FILTER FUNCTION.

```
process.stdout.setEncoding('utf-8')
let XMLHttpRequest = require('xhr2');
var request = new XMLHttpRequest();
request.open("GET", "https://restcountries.com/v3.1/all");
request.send();
request.onload=function()
{
    //var data = request.responseText;
    var result=JSON.parse( request.responseText);
    var res=result.filter((ele)=>ele.continents=="Asia")
    var res1=res.map((ele)=>`${ele.name.common}`)
    console.log(res1)
}
```
